

# WRITING\_API

## Writing API — External (Public)

**Base URL:** `/api/v1/writings` **Platform:** Spring Boot 3 · No Auth Required · Bilingual (CKB / KMR) · Paginated

**Note:** Read-only public endpoints. All file download URLs point to S3/CDN.

### Endpoint Summary

| Method | Path                                            | Auth Required | Description                                      |
|--------|-------------------------------------------------|---------------|--------------------------------------------------|
| GET    | <code>/api/v1/writings</code>                   | No            | Get all writings/books (paginated, newest first) |
| GET    | <code>/api/v1/writings/{id}</code>              | No            | Get one writing by ID                            |
| GET    | <code>/api/v1/writings/search/writer</code>     | No            | Search by author name                            |
| GET    | <code>/api/v1/writings/search/tag</code>        | No            | Search by tag                                    |
| GET    | <code>/api/v1/writings/search/keyword</code>    | No            | Search by keyword                                |
| GET    | <code>/api/v1/writings/series/parents</code>    | No            | Get all series parent books                      |
| GET    | <code>/api/v1/writings/series/{seriesId}</code> | No            | Get all books in a series                        |
| GET    | <code>/api/v1/writings/topics</code>            | No            | Get WRITING topics                               |

**GET `/api/v1/writings` — Get All Writings (Paginated, newest first)**

**Auth:** None — public

## Query Parameters:

| Parameter | Type | Default | Description          |
|-----------|------|---------|----------------------|
| page      | int  | 0       | Page index (0-based) |
| size      | int  | 20      | Items per page       |

## Response 200 OK :

### Response Fields:

| Field                    | Type   | Description                            |
|--------------------------|--------|----------------------------------------|
| <code>id</code>          | long   | Unique writing identifier              |
| <code>ckbCoverUrl</code> | string | Sorani cover image URL                 |
| <code>kmrCoverUrl</code> | string | Kurmanji cover image URL (may be null) |

| Field                                                 | Type    | Description                                                           |
|-------------------------------------------------------|---------|-----------------------------------------------------------------------|
| <code>hoverCoverUrl</code>                            | string  | Hover-state cover image URL (may be null)                             |
| <code>bookGenres</code>                               | array   | List of genre enums (e.g. <code>NOVEL</code> , <code>HISTORY</code> ) |
| <code>publishedByInstitute</code>                     | boolean | Whether published by KHI                                              |
| <code>topicId</code>                                  | long    | Assigned topic ID (may be null)                                       |
| <code>topicNameCkb</code>                             | string  | Topic name (Sorani)                                                   |
| <code>topicNameKmr</code>                             | string  | Topic name (Kurmanji)                                                 |
| <code>contentLanguages</code>                         | array   | Languages present                                                     |
| <code>ckbContent.title</code>                         | string  | Book title (Sorani)                                                   |
| <code>ckbContent.description</code>                   | string  | Synopsis/description (Sorani)                                         |
| <code>ckbContent.writer</code>                        | string  | Author name (Sorani)                                                  |
| <code>ckbContent.fileUrl</code>                       | string  | Download URL for Sorani edition                                       |
| <code>ckbContent.fileFormat</code>                    | enum    | <code>PDF</code>   <code>EPUB</code>   <code>DOCX</code> etc.         |
| <code>ckbContent.fileSizeBytes</code>                 | long    | File size in bytes                                                    |
| <code>ckbContent.pageCount</code>                     | int     | Number of pages                                                       |
| <code>ckbContent.genre</code>                         | string  | Genre label for this edition                                          |
| <code>kmrContent</code>                               | object  | Same fields as <code>ckbContent</code> for Kurmanji (may be null)     |
| <code>tags.ckb</code> / <code>tags.kmr</code>         | array   | Tags per language                                                     |
| <code>keywords.ckb</code> / <code>keywords.kmr</code> | array   | Keywords per language                                                 |
| <code>series</code>                                   | object  | Series metadata if part of a series (may be null)                     |
| <code>series.seriesId</code>                          | string  | Series identifier                                                     |
| <code>series.seriesName</code>                        | string  | Series name                                                           |
| <code>series.seriesOrder</code>                       | double  | Position in the series                                                |
| <code>series.parentBookId</code>                      | long    | Parent book ID                                                        |
| <code>series.totalBooks</code>                        | int     | Total books in the series                                             |
| <code>series.isParent</code>                          | boolean | Whether this book is the series parent                                |

| Field                  | Type   | Description                    |
|------------------------|--------|--------------------------------|
| <code>createdAt</code> | string | ISO-8601 creation timestamp    |
| <code>updatedAt</code> | string | ISO-8601 last update timestamp |

## GET `/api/v1/writings/{id}` — Get Writing by ID

**Auth:** None — public

**Path Parameters:**

| Parameter       | Type | Required   | Description |
|-----------------|------|------------|-------------|
| <code>id</code> | long | <b>Yes</b> | Writing ID  |

**Response** `200 OK`: Single writing object (same shape as array item above).

## GET `/api/v1/writings/search/writer` — Search by Author Name

**Auth:** None — public

**Query Parameters:**

| Parameter             | Type   | Required                 | Description                                                           |
|-----------------------|--------|--------------------------|-----------------------------------------------------------------------|
| <code>name</code>     | string | <b>Yes</b>               | Author name to search                                                 |
| <code>language</code> | string | No ( <code>both</code> ) | Search scope: <code>ckb</code>   <code>kmr</code>   <code>both</code> |
| <code>page</code>     | int    | No (0)                   | Page index                                                            |
| <code>size</code>     | int    | No (20)                  | Items per page                                                        |

**Response** `200 OK`:

```
{

      { "id": 15, "titleCkb": "دەروازە ی کوردستان - دووهم", "titleKmr": "Deriyê Kurdistanê – Duyemîn", "seriesOrder": 2.0, "createdAt": "2026-03-01T10:00:00" }
    ]
  }
}

```

```
}  
}
```

## GET /api/v1/writings/topics — Get WRITING Topics

**Auth:** None — public

**Query Params:** None

**Response** 200 OK :

```
{  
  "success": true,  
  "message": "WRITING topics fetched",  
  "data": [  
    { "id": 6, "nameCkb": "رۆمان", "nameKmr": "Roman" },  
    { "id": 7, "nameCkb": "مێژوو", "nameKmr": "Dîrok" },  
    { "id": 8, "nameCkb": "شيعر", "nameKmr": "Helbest" }  
  ]  
}
```

## Error Responses

| Status                    | Reason                                                                                              |
|---------------------------|-----------------------------------------------------------------------------------------------------|
| 400 Bad Request           | Missing required query parameter ( <code>name</code> , <code>tag</code> , or <code>keyword</code> ) |
| 404 Not Found             | Writing or series not found with the given <code>id</code> / <code>seriesId</code>                  |
| 500 Internal Server Error | Unexpected server-side failure                                                                      |
